### SUMMARY

As a Software Quality Assurance with more than 5 years of experience in several companies and freelance experience, makes me able to quickly adapt to new environments and quickly understand the business processes and products being developed. I have been a QA lead and PIC of the QA team, able to lead and manage a small team, responsible for mentoring the QA team, dividing tasks and monitoring the progress of the QA team's work and being involved in recruiting new QA. I have good analytical and problem-solving skills so I am used to being involved in risk analysis meetings or impact analysis meetings. I am a detail oriented and structured person.

### PROFESSIONAL SKILLS

|                                |                         |                        |                        |                   |                  |

### WORK EXPERIENCE

#### QA ENGINEER

PT. Bluebird Tbk - *Full time position*

( October 2022 - Present )

PT. Adi Consulting, *placement at PT Bluebird Tbk - Contract under vendor*

( April 2021 - October 2022 )

My contribution and achievement is involved in several teams and handling several products such as School Bus System, Bigbird Reservation, Logistic Bluebird, MyBluebird apps, Promotion, and Unified Payment Gateway. Involved in the ODRD (On-demand Rides and Deliveries) tracking project developed by Bluebird and Google, merger project of two Bluebird products (Bluebird Dispatching and Goldenbird Reservation), cloud migration from GCP to Huawei. Able to handle several products at the same time like Logistic, MyBB and ODRD products. Became the lead or PIC of the QA team in charge of assigning tasks and monitoring the progress of tasks from the QA team, involved in recruiting new QAs and mentoring QA internship.

- Created test cases and maintaining test scenarios in test case management on TestLink, Test Rail, or test scenario document.
- Perform manual or functional testing on API with Postman, website, Android, IOS, and Huawei mobile.
- Perform end-to-end testing of all application features during regression testing including component and functional testing.
- Do joint testing with clients to ensure client requirement criteria are met on User Acceptance Test.
- Do testing with other teams to ensure integration with other systems in System Integration Test.
- Conduct comprehensive and scheduled system testing on Regression and Alpha Test both functional, component and end2end.
- Conduct testing in real production environment before releasing product to public with Beta Test.
- Conduct testing after new feature deployment from backend and frontend side both sanity test and smoke test.
- Develop website automation testing using Katalon in staging environment and run it periodically.
- Load testing on the system using Jmeter and manage transaction data and payment data using DBaever.
- Coordinate with the teams involved and stakeholders including Developers, Product Managers, UI/UX, Clients, and Leaders.
- Exploratory testing and live testing or field testing to get direct user experience feedback.
- Identify issues and find out the root cause of the existing issue, then reproduce the issue and make a report.

Project Specification / related product.

- Web application, Dashboard Bigbird Reservation - Dashboard School Bus System.
- Web application, Dashboard Logistics Bluebird
- Project Google x Bluebird, ODRD System
- Mobile Application - MyBluebird Apps, Promo Portal - Promo for MyBluebird Apps
- Unified Payment Gateway
- Cloud migration from GCP to Huawei
- Web Application, Project merging Goldenbird - Bluebird Dispatching

## WORK EXPERIENCE

---

### QA ENGINEER
