Indonesia (Native)  
English (Spoken and Written)

## Summary

**QA Engineer** with over 4 years of experience at **MNC Group**, focusing on manual testing, API validation, and SQL-based data verification. Experienced in supporting SIT and UAT processes, performing defect analysis, and preparing end-to-end QA documentation to help ensure stable and reliable system releases. Adaptable and motivated to continue learning and growing in the IT field.

## Education

Bachelor's Degree (S1) in Informatics Engineering  
**Universitas Indraprasta PGRI**, Jakarta Timur  
GPA : 3.65 of 4

## Work Experience

- ❖ **Universitas Indrapasta PGRI** **2019 - 2021**
  - **Computer Lab Assistant**
    - Assist lecturers in directing practice
    - Laboratory Maintenance
- ❖ **PT Global Informasi Bermutu (GTV), Tbk** **2021 – Current**
  - **QA Engineer**
    - Conducted manual testing for web, mobile, and desktop applications to ensure all features met business requirements.
    - Managed comprehensive QA documentation including Test Plans, Test Scenarios, Test Cases (SIT & UAT), and Bug Reports to ensure system quality before release.
    - Performed API testing using Postman to validate response accuracy and backend data consistency.
    - Executed SQL queries for data validation, troubleshooting, and system integration verification.
    - Utilized browser Developer Tools (Network & Console) to analyze errors, validate API responses, and identify root causes of defects.
    - Collaborated with developers and product managers to report defects, track progress, and verify fixes.
    - Executed regression testing prior to releases to ensure system stability and reliability.
    - Gathered and analyzed user requirements to support application development and enhancements.
    - Provided user support via email and phone to resolve application-related issues.
    - Contributed to continuous improvement of QA processes, documentation, and overall testing workflows.
